HOW TO ADD ARTWORK TO YOUR GALLERY

Overview: Below, we will walk through how to add more artwork to your website gallery. This will involve adding an image to an album on Flickr, a photo sharing website. Your gallery on the Darby Doomsday site will then be automatically updated once you refresh the page.

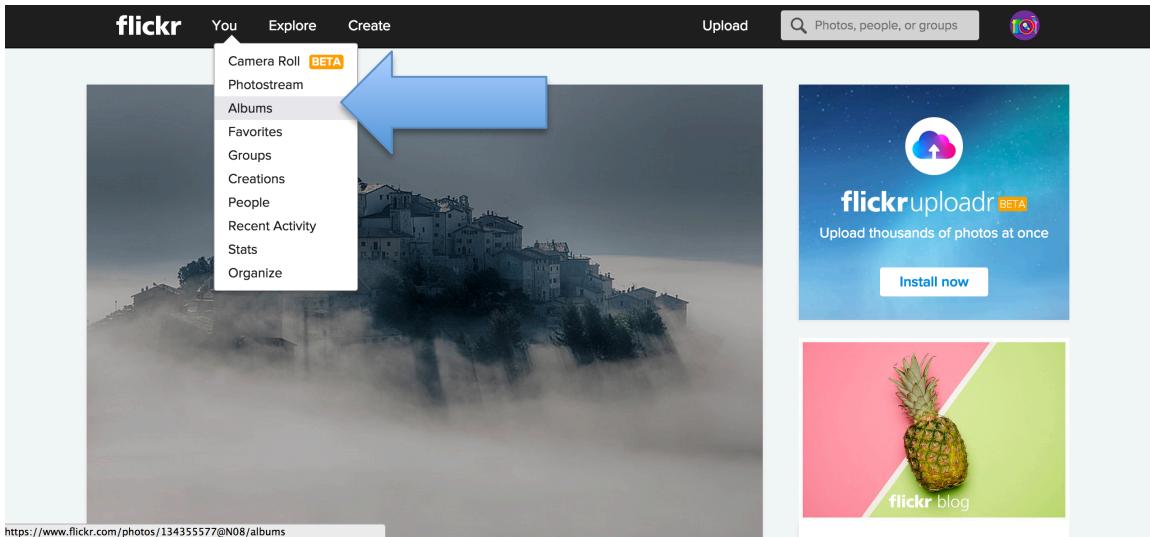

Step 1: Go to <https://www.flickr.com/> and click Sign In.

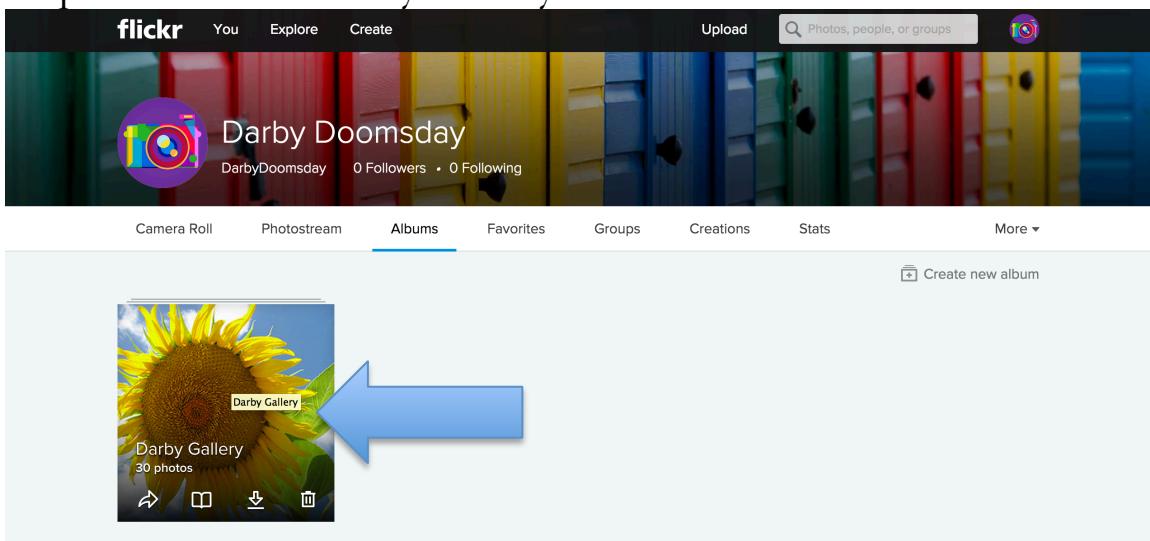

Step 2: Sign into your account. User: erniehebert@yahoo.com
Password: Fr11348409oak

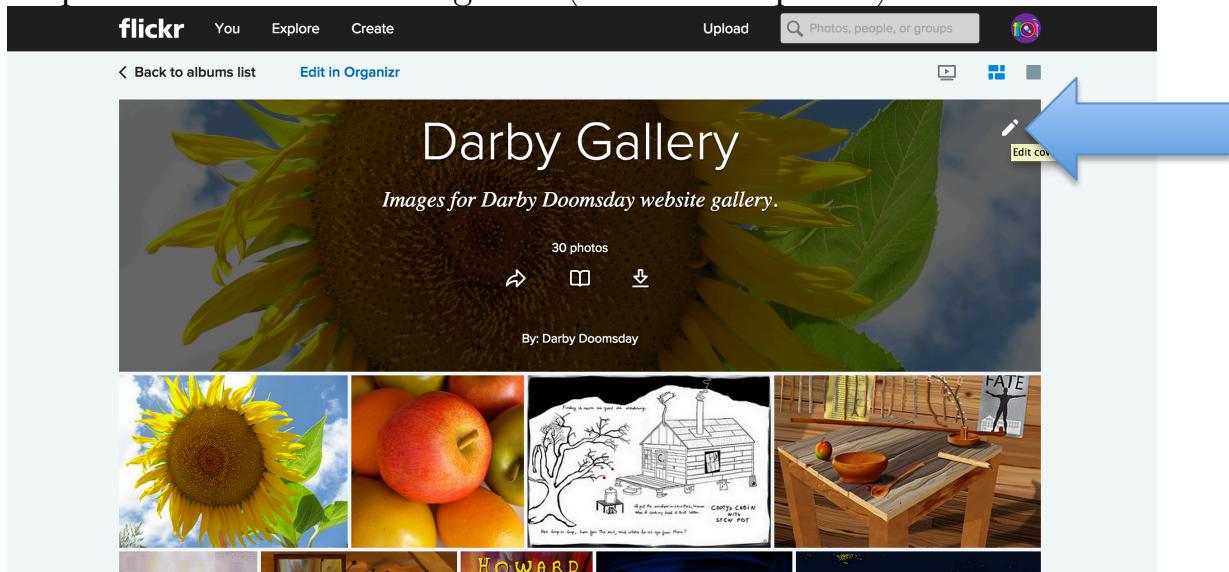

Step 3: Go to You>Albums.

Step 4: Click on “Darby Gallery.”

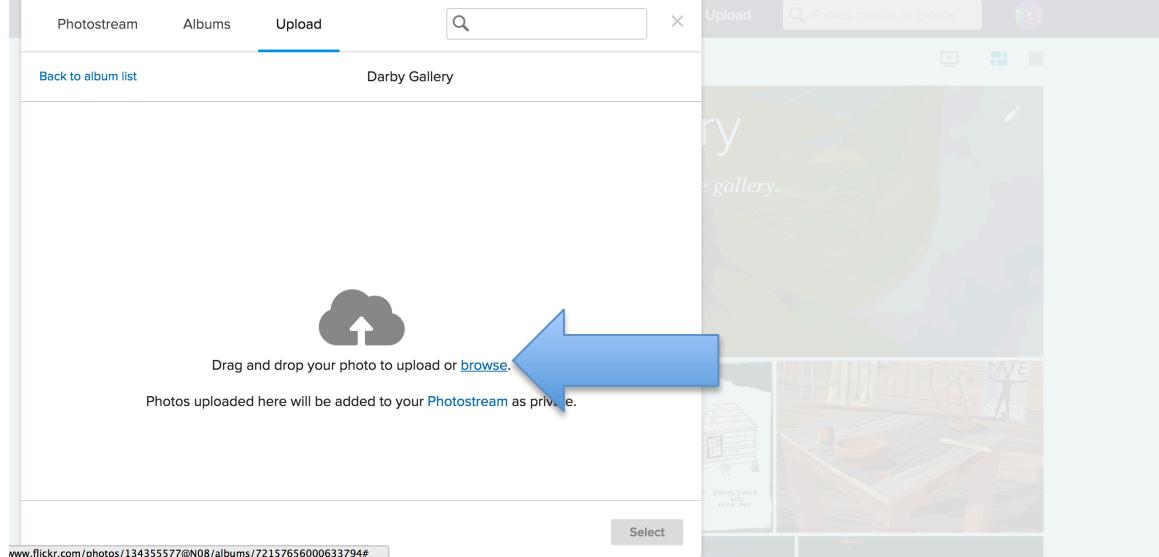

Step 5: Click on the editing icon (looks like a pencil).

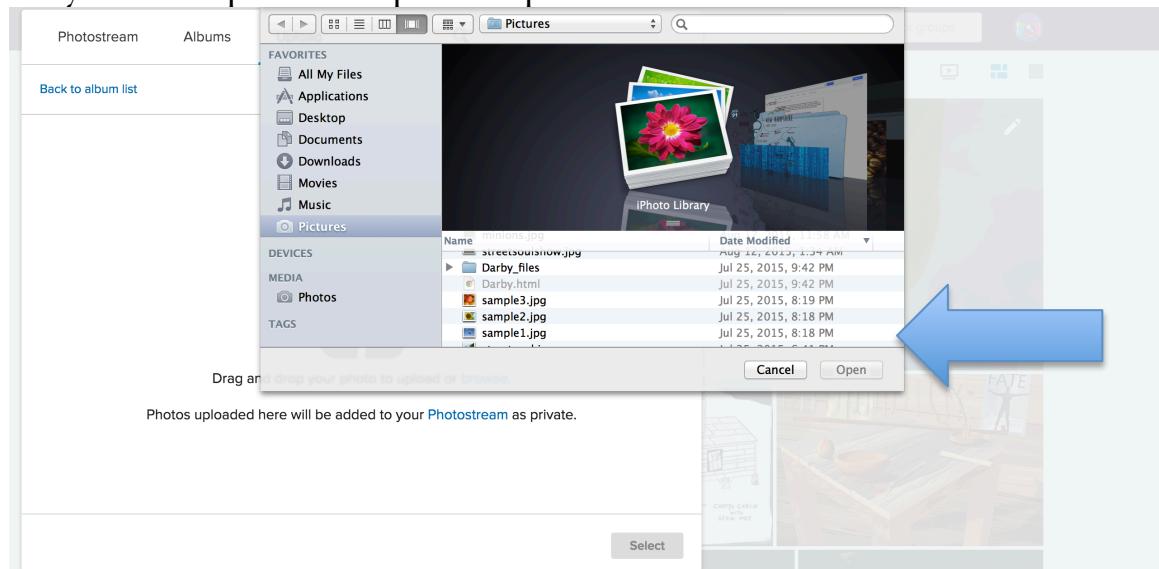

Step 6: If you haven't added your picture to Flickr yet, click on Upload and go to Step 7. If you have already added your picture to Flickr, click on Photostream and go to Step 9.

A screenshot of the Flickr homepage. At the top, there are tabs for "Photostream", "Albums", and "Upload". A search bar is also present. Below the tabs, there are two large blue arrows pointing towards the "Upload" and "Albums" tabs. The main area displays a grid of photo thumbnails. On the right side of the page, there is a larger image of a photo from a gallery, which appears to be the same "Darby Gallery" from the previous screenshot. The overall layout is clean and modern, typical of a web-based photo sharing platform.

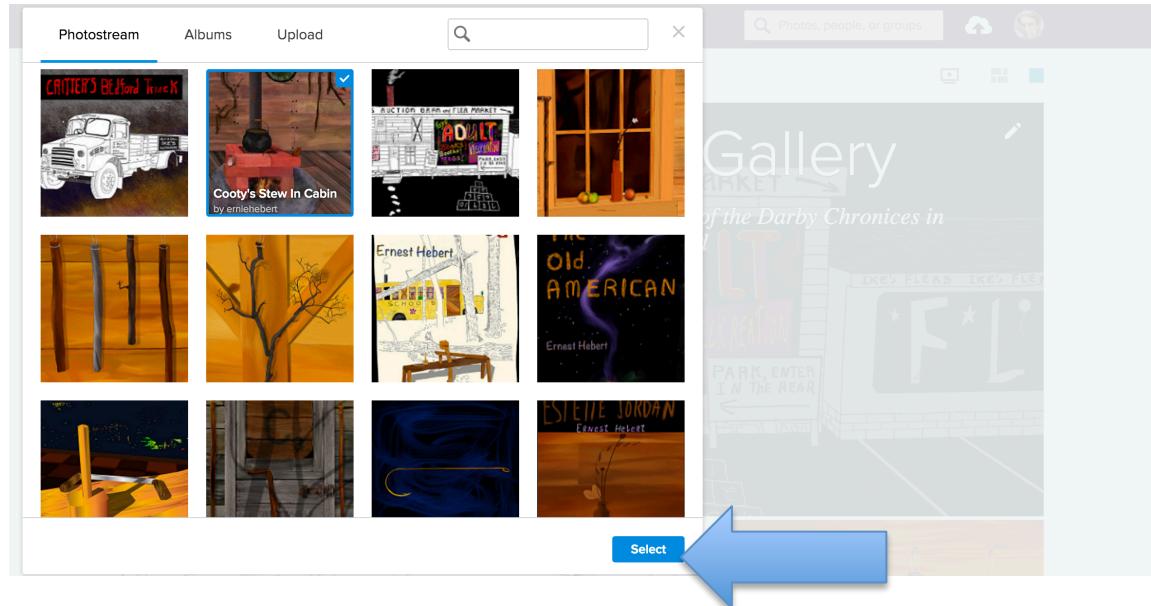

Step 7: If uploading, click on browse.

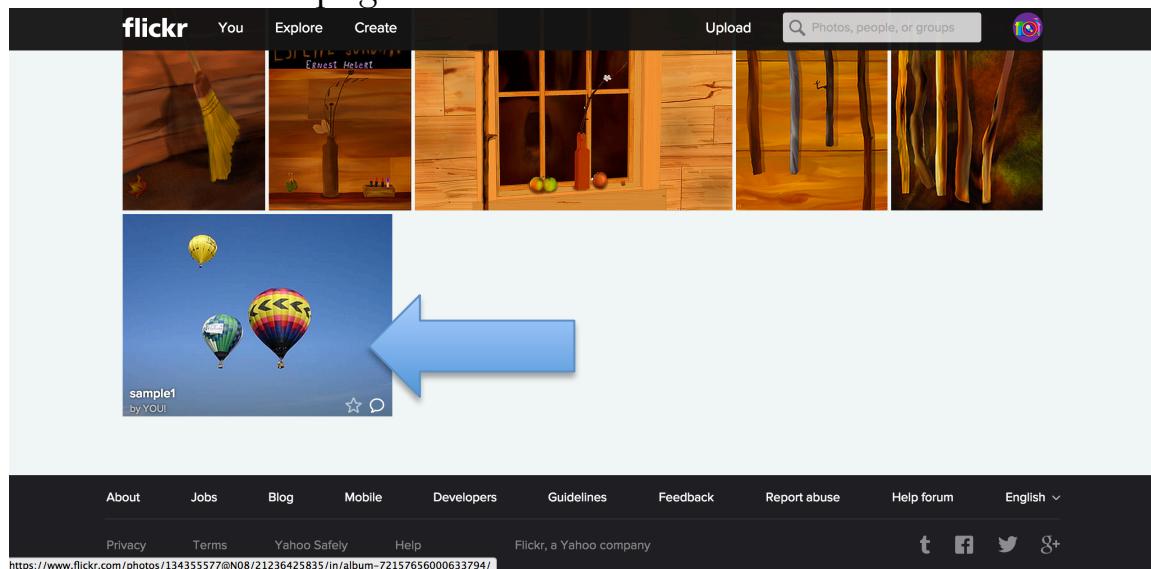

Step 8: If uploading, find the picture you want to add from the files on your computer. Skip to Step 10.

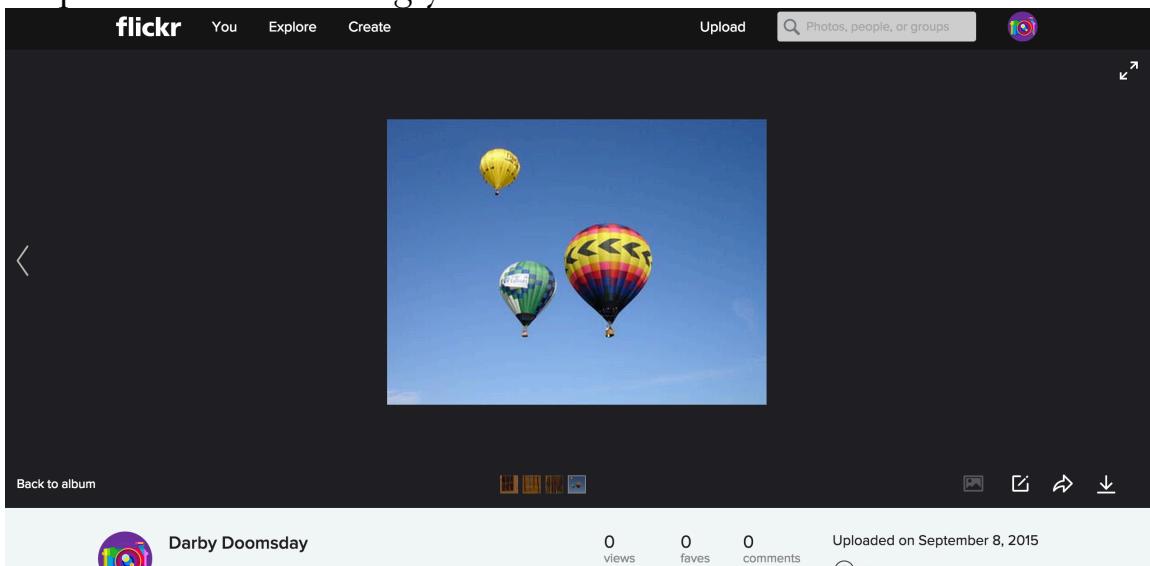

Step 9: If using Photostream, click on the picture you want, and then hit the select button.

Step 10: Click on the new picture you've added, which will be at the bottom of the page.

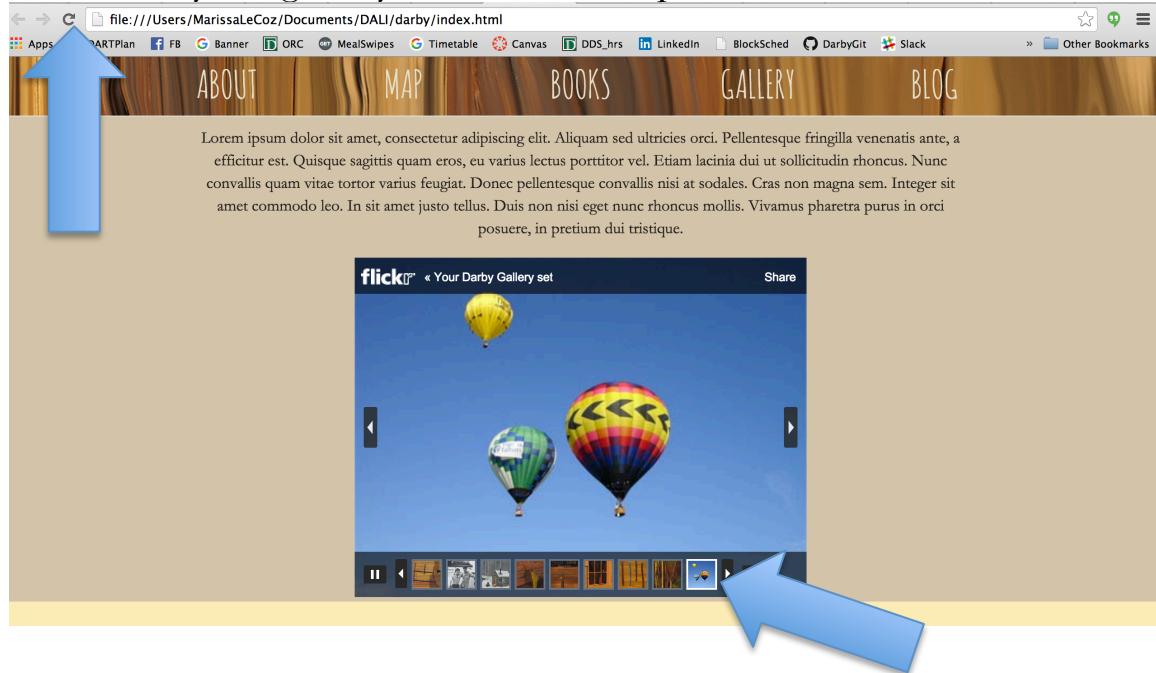

Step 11: That will bring you here.

Step 12: Scroll down and make the viewing setting Public. (The default is Private, and Private pictures won't show up in your website's gallery.)

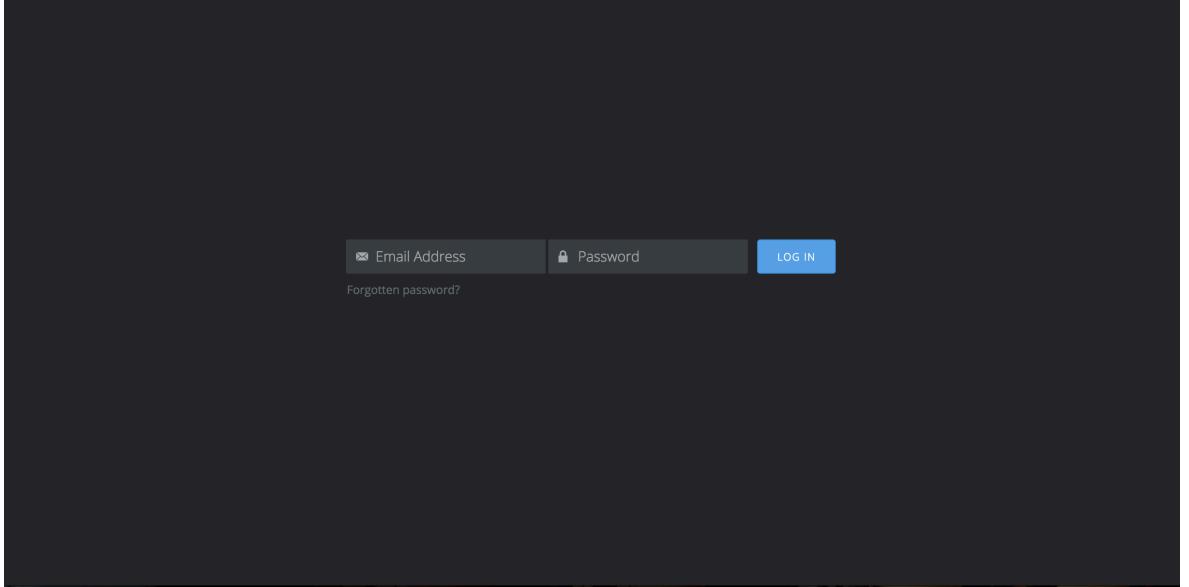

A screenshot of a Flickr photo page with a large blue arrow pointing to a dropdown menu. The menu is open and shows options: 'Public', 'Private', 'Friends', 'Family', and 'Friends & Family'. The 'Private' option is currently selected. Other parts of the page include a navigation bar, photo details like 'This photo is in 1 album', and a footer with various photo editing tools.

Step 13: Hit the refresh button on your web browser, and scroll to the end of your gallery to see the new picture.

LOGGING INTO YOUR BLOG ADMIN PANEL

1. Go to www.ernesthebert.com/ghost. Email: erniehebert@gmail.com Password: oel#1601

HOW TO POST POETRY, ESSAYS, AND BLOG ENTRIES

1. Go to www.ernesthebert.com/ghost. Email: erniehebert@gmail.com. Password: oel#1601

2. Click “New Post.”

First Post

Thanks to Tim and Marissa, I've set up this blog from Ghost Pro. The info that follows is information Ghost Pro on formatting. I'll change it later.

Getting Started

Ghost uses something called Markdown for writing. Essentially, it's a shorthand way to manage your post formatting as you write!

Writing in Markdown is really easy. In the left hand panel of Ghost, you simply write as you normally would. Where appropriate, you can use *shortcuts* to **style** your content. For example, a list:

- Item number one
- Item number two
 - A nested item
- A final item

- 3 Enter a title and content for your poem, essay, or blog entry. Then click on the little gear icon.

The screenshot shows a blog editor interface for 'Darby Doomsday' by erniehebert. On the left is a sidebar with options like 'New Post', 'Content', 'Team', 'General', 'Navigation', 'Tags', 'Code Injection', and 'Labs'. The main area has a 'Title' field containing 'Content here|' and a 'Content here' area below it. In the top right corner, there is a blue arrow pointing towards a gear icon. Other UI elements include a search bar, a 'SAVE DRAFT' button, and status indicators like 'Markdown', 'Preview', and '2 words'.

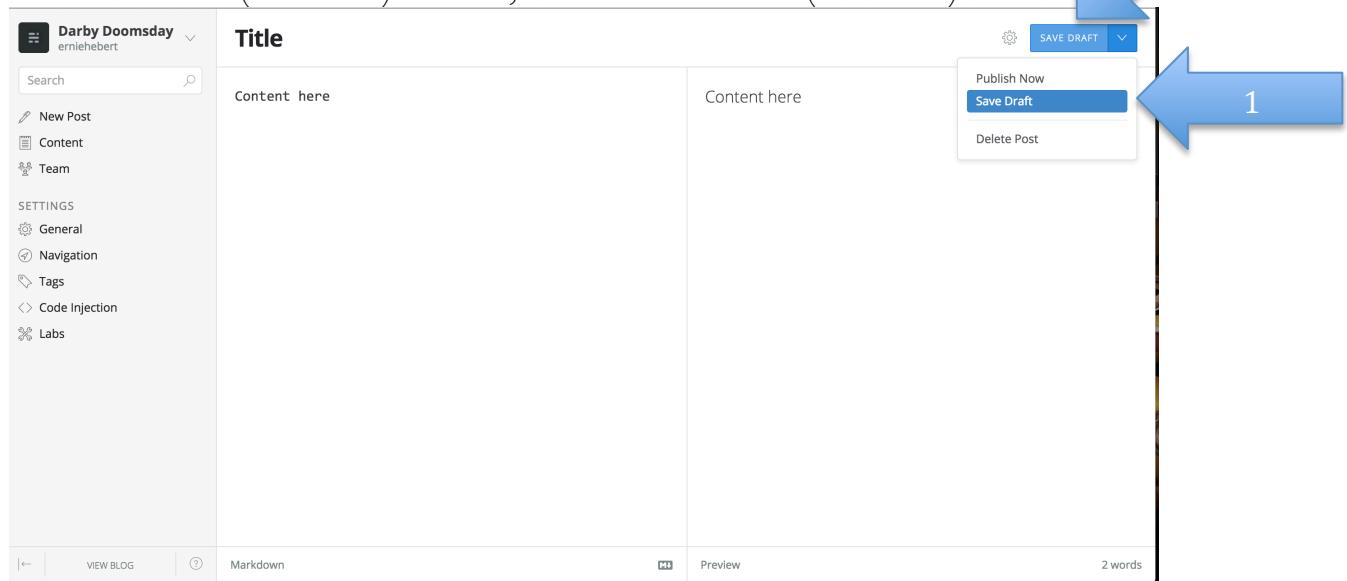

4. This brings up a panel with more options. The crucial move is to enter the proper “tag.” This is what makes the posts show up in the different sections.

To make the post show up in this section....	...use this tag
Essays	Essays
Poetry	poetry
Blog	Blog

If you want the same post to show up in multiple sections, you can use multiple tags! When you’re done, you can x-out the panel.

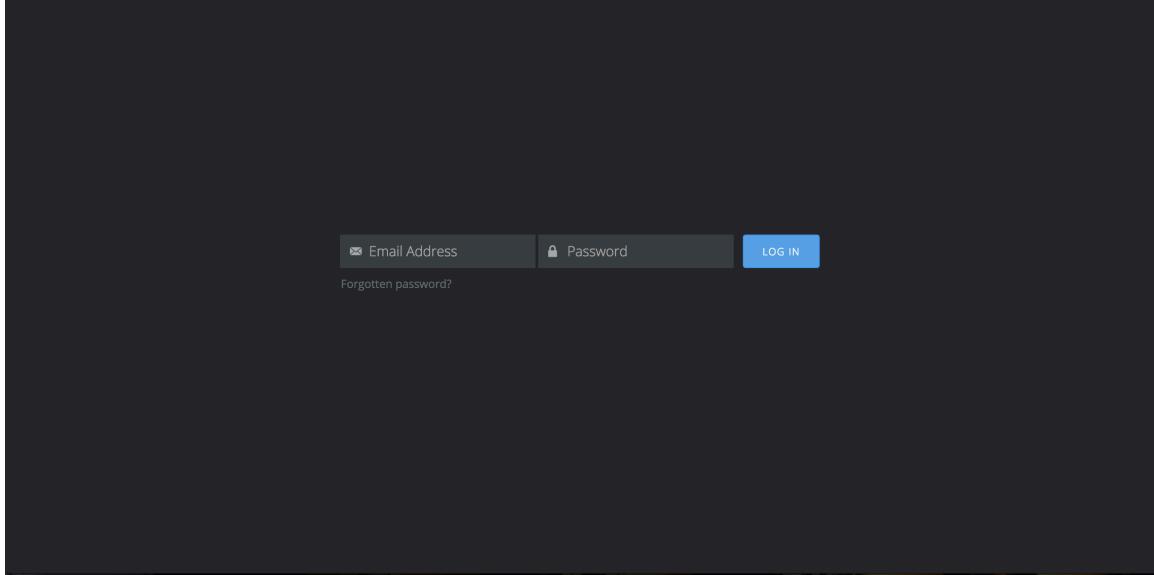

The screenshot shows the same blog editor interface as before, but now with a 'Post Settings' panel open on the right side. The panel includes fields for 'Post URL' (set to 'pos'), 'Publish Date' (set to '04 Nov 15 @ 21:32'), and a 'Tags' section. In the 'Tags' section, 'poetry' is listed as a tag. Other sections in the panel include 'Add post image', 'Add poetry...', and 'Meta Data'. A blue arrow points to the 'Tags' section.

5. Click the drop-down arrow, and select either Save Draft or Publish Now (arrow 1). Then, click the button (arrow 2).

HOW TO EDIT OR DELETE A POST

1. Go to www.ernesthebert.com/ghost. Email: erniehebert@gmail.com. Password: oel#1601

2. Click on the post you want to edit or delete (arrow 1). Then click on the edit button (arrow 2).

First Post

Thanks to Tim and Marissa, I've set up this blog from Ghost Pro. The info that follows is information Ghost Pro on formatting. I'll change it later.

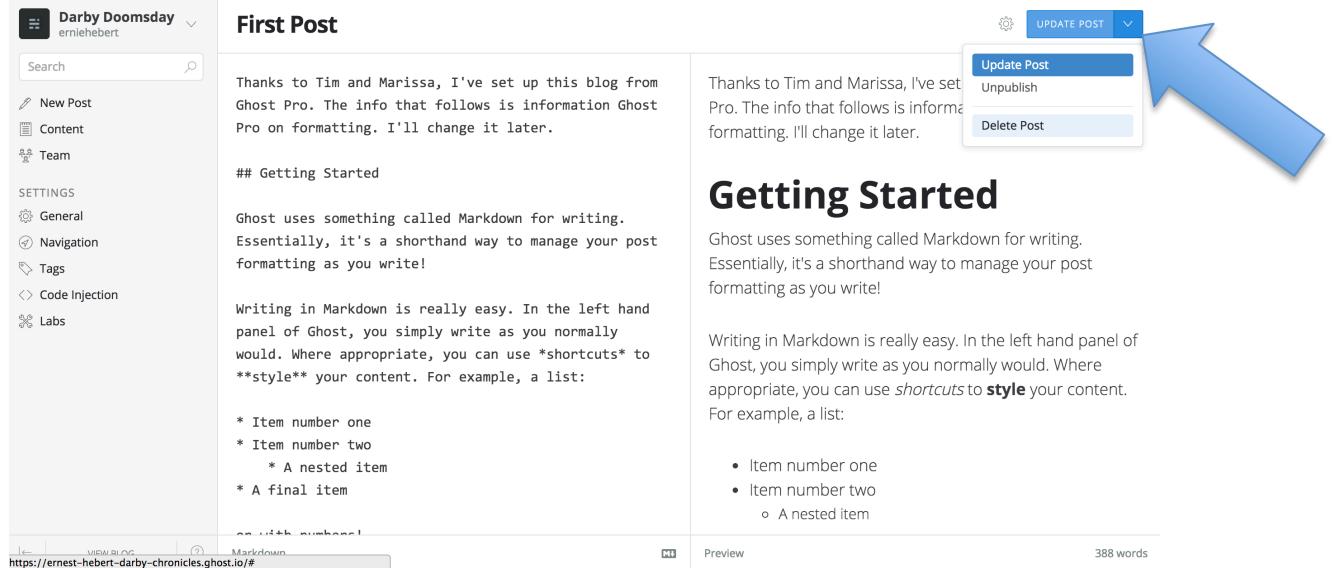

Getting Started

Ghost uses something called Markdown for writing. Essentially, it's a shorthand way to manage your post formatting as you write!

Writing in Markdown is really easy. In the left hand panel of Ghost, you simply write as you normally would. Where appropriate, you can use **shortcuts** to **style** your content. For example, a list:

- Item number one
- Item number two
 - A nested item
- A final item

3. If editing, make your changes to the content of the post, and then click the Update Post button. If you'd like to delete the post, select Delete Post. If you want to unpublish, select the Unpublish option, and then click the button that turns red.

The screenshot shows the Ghost Pro dashboard with a post titled "First Post" selected. The left sidebar includes options for "New Post", "Content", "Team", "SETTINGS" (General, Navigation, Tags, Code Injection, Labs), and a search bar. The main content area displays the post's Markdown code and preview. The top right corner of the editor has a toolbar with "UPDATE POST" (highlighted by a blue arrow), "Unpublish", and "Delete Post". Below the editor, the preview pane shows the formatted content and statistics (388 words).

To go back to your list of posts, click on Content in the leftmost menu.
